

SCT has All Your Thin Film Deposition Solutions

System Control Technologies designs and manufactures a wide range of thin film coating systems.

- Thermal and Electron Beam Evaporation
- RF/DC Sputtering
- Ion Plating
- Ion Beam Sputtering
- Plasma Deposition
- Ion Assisted Deposition
- Web Coating

We serve a wide variety of markets including precision optics, fiber optics, OLED's, displays, electronic devices, sensors, flat panels, semiconductors, functional and decorative, flexible circuits, electro-optics, storage media, MEMS and nanofabrication, photovoltaics, compound semiconductors and defense industry applications.

System Control Technologies

322 Lindbergh Ave. • Livermore, CA 94551 • PH: 925-373-9730

ORION SERIES EVAPORATION SYSTEM

Optical, Semiconductor or Low Temperature Organic Applications

- Chamber Size from 500mm to 1500mm
- Multiple Electron Beam and Thermal Sources
- Ion Assisted Deposition and Substrate Pre-cleaning
- Plasma Deposition and Substrate Pre-cleaning
- Completely Automatic System
